

Smart Sheet -- Application

General complaint that may arise from a customer is that the Smart Sheet leaves few dark spots after applying it to the Acrylic Sheet.

This can be avoided by ---

- Requires a very clean dust-free surroundings while mounting the Smart Sheet to the Acrylic panel
- Before mounting the Smart Sheet the Acrylic Panel has to be thoroughly cleaned to get rid of small dust particles, minute fiber particles & finger prints
- Silicon Rollers and Dust Removal pads can be used to remove the dust particles and finger prints.
